Product Features

- 2 Lighting modes – Normal and High brightness
- Uses bright LED technology and produces 100% white light suitable for indoor use and as a personal light
- Advanced and innovative design with embedded solar panel on reverse side for charging
- Uses the world's best LEDs from Nichia, Japan
- Easy to operate and charge, even by children
- Most useful for women while cooking and for children studying at night
- Light bright enough to match 2-3 kerosene lamps.
- Zero emissions and no smoke, fumes, soot, etc.

Product Specifications

- LED Wattage : 0.5 Watts
- Battery : 1.2V, 1200 mAh
- Solar Panel : 0.3 Watts
- ABS Plastic Body
- Microprocessor based electronic circuitry
- Warranty: 6 Months against any manufacturing defects.

Carry in your pocket
where ever you go!

Product Benefits

- Very economical model for the benefit of women and children in rural and off-grid areas
- Uses freely available solar energy for charging
- Eco-friendly light with zero emissions and safe for everyone to use
- Small enough to fit into the pocket
- The embedded solar panel at the back of the light makes it easy to charge just by placing the lamp face down in the sun. No more extra wires and solar panel to manage.
